

Ferdie Taruc

Product Analyst | Expertise in Python, SQL, & Looker | Brooklyn, NY
(562) 374-3069 | ferdie@berkeley.edu | linkedin.com/in/ferdietaruc | github.com/ftaruc

Skills

-
- **SQL** (Snowflake, window functions, CTEs) • **Python** (pandas, scikit-learn, Streamlit) • **Looker** (LookML)
 - **R** (R Shiny) • **Experimentation/stats** (hypothesis testing, regression) • **Stakeholder communication**

Work Experience

Senior Product Analyst | Lemonade - New York, New York **Aug 2022 - Present**

- **\$25M premium impact:** partnered with Insurance Ops & Actuarial to research, file, and implement **20 rate changes** in the Homeowners/Renters line; built the analysis, wrote decision memos, and presented trade-offs.
 - **Staging QA under SOX:** staged policies to validate **web flows, error handling, and rate, form, and guideline changes** before launch; documented acceptance criteria and sign-offs.
- **Risk modeling:** developed a Python **gradient-boosting** model to flag the **top 20% highest-risk** homeowner policies using first-party + Verisk features; expected to reduce **attritional loss ratio ~10%**; drove and validated data requirements with Product, Data Science, and Insurance partners.
- **Dashboards for executives:** built and maintained **LookML + Looker** suites monitoring **10+ KPIs across 29 states**(segmentation, retention, release effects); standardized definitions and alerting.
- **Feedback → fixes:** triaged **10+** pricing/system defects from QA and internal channels; sized impact in SQL, prioritized with PM, and shipped fixes that **avoided ~\$1M premium leakage**.
- **Pricing ops:** owned Excel-based production raters; kept parity with filed pricing algorithms and **29-state** regulatory updates; sped change propagation by templating inputs and QA.

Product Analyst | Metromile (*acquired by Lemonade*) - San Francisco, California **Nov 2021 - Aug 2022**

- Shipped a **Streamlit** app replacing spreadsheet analyses; tracked car premium trends and segmentation; reduced manual work and improved time-to-insight for the Pricing team.
- Partnered with Insurance Ops & Actuarial on **3** pay-per-mile rate changes (**~\$2M** premium impact); built dislocation analyses and recommendation summaries.

Product & Research Analyst | Geico - Chevy Chase, Maryland **Aug 2021 - Nov 2021**

- Built **two R Shiny dashboards** to monitor a new **Telematics** program (3 states); replaced brittle internal tools, enabling reliable release stability checks and growth tracking against OKRs.

Presto Data Science Intern | Treasure Data (*Arm Ltd.*) - Tokyo, Japan **Jun 2019 - Aug 2019**

- Researched tree-based models to predict **CPU, memory, and query duration** from historical Presto logs; **~25%** workload efficiency improvement in a simulated setting; explored clustering with S3-stored metadata to cut high-CPU queries by **~10%** relative to baseline.

Education

Double Major: B.A., Data Science and Economics | University of California, Berkeley **Graduated: Dec 2020**

Relevant Coursework: Data Structures and Algorithms, Artificial Intelligence, Probability for D.S., Data Inference and Decisions, Computational Structures in D.S., Data Mining, Econometrics, Time Series, Game Theory

Projects

Analyzing Grailed: Fashion Trends through Customer Listings

Developed a Python web application through Streamlit that allows users to analyze trends in sellers and listing features that are automatically scraped from Grailed, an online marketplace for streetwear and designer clothing
